DETAILED ACTION

Receipt is acknowledged of a reply to the previous Office Action, filed December 11, 2003. Amendments were made to the claims.

Claims 1-3, 5, 6, 9-13, 17, 19, 20 and 27-43 are pending and under consideration in the instant application. Any rejection of record in the previous Office Action, mailed August 11, 2003, that is not addressed in this action has been withdrawn.

Specification

The disclosure is objected to because of the following informalities: page 52 of the specification contains an informal sequence listing that is not in the proper format. Cancellation of this information would be remedial, in view of the fact that a properly formatted sequence listing was subsequently filed and entered into the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 10 and 20 are rejected under 35 USC 112, second paragraph, as being indefinite for failing to recite a proper Markush group. In order for the claims to be definite, they must recite the proper Markush language, wherein the members of the

Art Unit: 1636

Markush group are "selected from the group consisting of", followed by the listing of the members of the group. In addition, the conjunction "and" must follow the penultimate member of the group. In the instant case, the claims have both conjunctions "or" and "and" present in the claim language. This makes the claim indefinite because it is unclear if the selection is made from either (a) the whole collection of a radioactive label, a non-radioactive isotopic label, a fluorescent moiety, a visibly-detectable moiety and a releasable substrate or (b) a co-factor for a chemical and enzymatic reaction, or if each of the individual items is a single group (i.e., pick one from either (a) or (b) set forth above). It would be remedial to indicate the following language, if the latter is true: "... wherein said cap-labeled mRNA substrate is labeled at the cap of said cap-labeled mRNA substrate by a label selected from the group consisting of a radioactive label, a non-radioactive isotopic label, a fluorescent moiety, a visibly-detectable moiety, a releasable substrate, a co-factor for a chemical reaction, and a co-factor for an enzymatic reaction."

Allowable Subject Matter

Claims 1-3, 5, 6, 9, 11-13, 17, 19 and 27-43 are allowed.
